

Discovering Science: Year 2

Sandra Bishop

Date Available: 18/12/2013
ISBN: 978 1 74330 875 2
Code/SKU: HB8752
RRP: \$39.95
Format/Page No.: A4, 226 pages
Age Group: Early Learning, P-2
Topic: Activities and exercises,
Curriculum
Learning Area: Science

Summary:

This Year 2 science teacher and student book is fully aligned to the Australian Curriculum and covers each of the three interrelated science strands – Science Understanding, Science as a Human Endeavour and Science Inquiry Skills – as well as the related sub-strands.

It includes subject planners, week-by-week lesson plans and assessment record sheets for the teachers, as well as worksheets, resource and self-evaluation sheets for the students. Each lesson plan includes content descriptions, required resources, skills, a step-by-step activities section, extension activities and assessment ideas.

The activities for each week take a simple yet imaginative approach. Young scientists will enjoy developing their skills – from predicting, investigating and observing to cooperating, reporting and role-playing – whilst learning about science and its place in their everyday lives.

The activities build on several learning areas covered in the previous level and also introduce new topics. Students develop an understanding of water and wind use; learn about life cycles and the changes to human and animal bodies; experiment with testing and making new materials; and discover the concept of gravity.
