Age Range:	P-11
Category:	Professional Development
Subject:	Thinking and Learning

Summary:

If learners are provided with a diversity of thinking processes, outside of their usual subject disciplines, and these processes are introduced in relation to their associated learning jobs, cross-curricular thinking skills will be further promoted. Learners will then be empowered to select the right process, at the right time, to achieve quality results. The thinktank learning process poster series is comprised of frameworks designed to facilitate this. This complete set of the Lane Clark process posters includes sciencethink, techthink, futurethink, solutionthink, authorthink and thinkitgreat posters, student sheets, criteria and planners, as well as the Processes for Thinking and Learning booklet.
