Date available:	Dec 2004
ISBN:	1 74101 123 X
Code:	IDA7911
RRP:	\$19.95
Format:	210 x 290 mm
Extent:	80 pgs
Age range:	early years
Category:	problem solving

Summary:

As part of the *Get your Hands on Problems Solving* series, this book introduces children to 52 non-routine logic and maths story problems that make developing problem solving skills interesting and fun. The 12 teaching plans outline useful strategies and tips to try when developing problem solving skills in the classroom.

The stories in this book show humorous characters in situations that are familiar to children with clear, reproducible instruction pages. Topics include looking for patterns, guessing and checking, making lists, making tables and charts, and logical thinking with hands-on suggestions for finding answers that help provide authentic learning experiences.

About the authors:

Shirley Hoogeboom and Judy Goodnow are authors, curriculum developers and editors. Together they have taught children from kindergarten through to year six. As curriculum developers, they have each authored or co-authored over 100 books and sets of games and activities for reading, English and maths.

Supporting resources:

- *Get your Hands on Problem Solving* (IDA7910)
- *Problem Solving: Prep-2* (5348)
- *Thinking Like a Maths Problem-Solver* (CA91820)

Key selling points:

- 12 step-by-step teaching plans
- 52 non-routine story problems
- hands-on activities providing authentic learning experiences
- suggested extension ideas
- list of children's books that can be used to set problem solving scenarios
