Maths Experiences for the Young Child***

Author: Imogene Forte and Joy MacKenzie

Date available:	Jan 2005
ISBN:	1 74101 062 4
Code:	INA3111
RRP:	\$32.95
Format:	210 x 290 mm
Extent:	126 pgs
Age range:	early childhood; primary prep-year 2
Category:	early childhood development; numeracy; maths; classroom practice

Summary:

A preschool child's environment should be saturated with opportunities to use numbers in natural and meaningful settings. The activities in this book provide a maths development base easy for children to relate to their everyday lives and the hands-on alternatives to paper-based work help development authentic understanding of fundamental numerical concepts.

Topics in this book include:

- learning about shapes
- learning to read and write numbers
- counting by sets
- using size words
- living with numbers

With concept tests and reviews arranged to assess understanding, teachers can help their students establish real learning skills within a fun and meaningful learning environment. This book works towards creating a classroom where maths is embraced as a can-do subject, rather than simply considered a must-do chore.

Supporting resources:

- *The All-New Kids' Stuff Book of Creative Science Experiences* (INA3113)
- *Super Games for Early Maths* (INA3113)
- *All About Skills: Concepts* (MMA2153)
- *All About Skills: Sequencing* (MMA2156)

Key selling points:

- sequentially ordered activities to help ensure authentic learning experiences
- topic reviews
- activities and puzzles based around ideas familiar to young children
- user-friendly format
- mathematical vocabulary list
