## Key Selling Points:

- Covers a wide range of strategies and recognised taxonomies for teaching thinking skills
- Provides models of classroom activities based on each summarised strategies or taxonomy
- Includes 52 examples of activities that enhance higher thinking skills

## Summary:

What could be more important than teaching students to THINK? Integrating thinking into the curriculum can often be quite challenging for busy, time-poor teachers. This book offers a wealth of information and practical strategies for teaching important thinking strategies and skills to your students. Each major taxonomy of teaching strategies is presented in an easily assimilated one-page summary. The taxonomies that are covered include Bloom's, Multiple Intelligences, Integrated Instruction, Co-operative Learning and Authentic Assessment. This valuable resource includes charts, forms, model activities and sections of things to do to reinforce higher order thinking skills.
