RRP: \$55.95
Format/Page No.: B5, 220 pages
Year Level: Teachers and Administrators
Focus Area: Professional Development,
Activities and Exercises,
Curriculum

Key Learning Area: Cross-Curricular

Summary

Make, Learn, Succeed: Building a Culture of Creativity in Your School. To adequately prepare students for success, our schools must encourage students to evolve and develop as creative individuals. Today's educators are challenged to establish an instructional practice that will support the development of student creativity, as well as meet curricular goals and assessments.

In this book, author Mark Gura shows that creativity can be developed and that, thanks to the variety of technology resources available, doing so is not only possible, but practical and effective.

Offering rich examples and ready-to-implement activities, the book describes how to develop creativity by:

- Establishing and creativity-friendly learning environment
- Weaving maker, STEAM, robotics and gaming into instruction.
- Encouraging motivation, entrepreneurship, curiosity and play.
- Using technology tools and resources to support student creativity.

Mark Gura has been an educator for more than three decades. He works with Touro College, Fordham University and other organizations to promote the use of technology to provide highly motivating, relevant activities for students. Gura is the author of *Getting Started with LEGO Robotics* and the editor of *Teaching Literacy in the Digital Age*.
