

Bring Your Own Learning: Transform Instruction with Any Device

Author(s): Lenny Schad

Date Available: 27 March 2014
ISBN: 978 1 76001 191 8
Code/SKU: IST1918
RRP: \$27.95
Format/Page No.: 180x250 mm, 242 pages
Age Group: P-12, Professional Development
Topic: Leadership
Learning Area: Cross-curricular, Technology

Summary:

Mobile technology fundamentally changes the way students learn. It allows them to explore beyond the classroom walls, ask probing questions about the world and create their own personalised learning experiences. Introduce mobile devices to the classroom and watch students become absorbed in their learning.

In *Bring Your Own Learning*, the author provides a roadmap for implementing a BYOD initiative in any educational system. His reflections on how he realised his district needed a mobile learning program – and how it was executed – can help other educators formulate their approach to developing a systemwide BYOD program. The goal of this book is for school leadership teams, administrators, board members, teachers and parents to walk away with the following key points of knowledge:

- Clear understanding of why we need to promote mobile learning
- Clear understanding of what mobile learning is and what it looks like
- Clear understanding of the steps necessary for mobile learning to be successful
- Clear understanding that implementation is an evolution and needs time to become systemic in any educational system
- Clear understanding of the benefits of mobile learning or BYOD programs

Bring Your Own Learning is the perfect resource for the modern classroom, and will help to turn mobile devices from tools of distraction into tools for learning.
