Summary:

Ignoring, or worse, demonising a technology that students willingly and actively use in every other aspect of their lives is not a winning educational strategy. Tapping into the ubiquitous power of modern communications technology and merging it with the flexibility and excitement of the Interactive Web (Web 2.0), Kolb provides a vision in which engaged students use the tools of their choice to enhance learning both inside and outside the classroom. Mini lessons and powerful resources throughout the book are easily adaptable and appropriate for almost any year level.
