Summary:

Ever since Howard Gardner first conceived the idea of multiple intelligences, educators have looked for ways to apply his theory to curricular design. In this book, Walter McKenzie shows us that instructional technology can be the ideal tool for doing just that.

Providing a host of lesson ideas and planning materials that make use of current hardware, software and online resources, McKenzie demonstrates how multiple intelligences theory can be teamed with technology to produce curriculum that inspires every student to learn.

Features: Sample lessons and classroom activities; Materials to support multidisciplinary and special needs teaching; Worksheets, templates, rubrics and guidelines for evaluating media and software; Multiple intelligences survey, evaluation tools and useful templates on CD-ROM.
