Code:	IST3896
RRP:	\$21.95
Format:	A4
Age Range:	P-12
Category:	Professional Development
Subject:	Information and Communication Technologies

## Summary:

Introduced in 1998, the National Educational Technology Standards (NETS) Project is an ongoing initiative of the International Society for Technology in Education. The NETS Project works to define standards for students, integrating curriculum, technology and standards for student assessment and evaluation of technology use. As technology, resources, practices and assessments changed over time, it became necessary to review and refresh the standards. This book includes the revised text of the National Educational Technology Standards for Students, as well as discussion of the need for technology standards, a project overview, student profiles and examples, and the results of a scenario survey.
