Summary:

A powerful technology, but a simple concept, RSS (“Really Simple Syndication”) makes it possible to easily access frequently updated content on the Internet. RSS allows you to have updates automatically delivered to your computer. Many Web 2.0 tools, including blogs, podcasts and wikis, have been made even more useful with the advent of RSS technology. Let expert John Hendron show you how to use a news aggregator to harness the power of RSS for classroom projects, professional development, and keeping students and parents informed. Learn how to use free and inexpensive software to manipulate audio files and create podcasts.
