

Teaching with Digital Images: Acquire, Analyze, Create, Communicate

Editors: Glen L. Bull and Lynn Bell

Date Available: 9 September 2010
ISBN: 978 1 74239 400 8
Code: CO4008
RRP: \$55.95
Format: A4, 190 pages + CD-ROM
Age Range: Years P–8
Category: **ICT Resources**
Subject: Photography

Summary:

Classroom teachers are just beginning to realise the amazing instructional potential of digital images, and this first-of-its-kind book will get you up to speed fast. Experienced practitioners and subject area experts demonstrate innovative uses for digital images, including data collection, scientific visualisation, mathematical analysis and digital storytelling. Kids love to take pictures with digital cameras, and the images they capture can be used to address curricular objectives in all of the core content areas. If you have a digital camera in your classroom, you need this book – and if you don't, this book will give you plenty of reasons to start using one! Introductory chapters discuss digital photography basics, image editing software, copyright issues and visual literacy. Digital image activities for maths, science, English and social studies come complete with tips, techniques and classroom management strategies.
