Year Level:	5–12, Teachers and Administrators
Focus Area:	Activities and Exercises, Classroom Practice and Direct Instruction
Key Learning Area:	Cross-Curricular

Summary

Growing numbers of teachers, schools and districts have expressed an interest in bringing the flipped classroom into their settings in order to help their students learn. Flipped learning empowers educators to engage students, personalise learning and reclaim valuable class time. But you may still be wondering, “How can this model work for me?” While there’s no step-by-step formula for flipped learning success, this workbook guides you through developing an approach to flipped learning that will serve you and your students.

From the best-selling authors of *Flip Your Classroom* this companion workbook includes questions and activities to help you reflect on the why and how of flipping your classroom. You’ll explore the flipped classroom and flipped-mastery models while delving into key elements of flipped learning, such as crediting or finding videos, designing a flipped lesson, preparing for change and working with administrators.

One of the best ways to improve as an educator is to reflect on what is effective and what is ineffective in your class. This workbook will help you through the process of thinking through your “version” of the flipped class. The questions and activities will not merely lead you to flip your class, but even better, to flip your class effectively.

Flipped learning can transform your teaching. Learn how to do it your way.
