## Summary:

This book speaks directly to computer lab teachers, advising on the components of a lab that creates lifelong technology learners. Holly Poteete presents educators with ten units, each containing two to three lessons and associated supplemental materials on the accompanying CD. The units and lessons can be used as a starting point or as a year-long program, or they can be adapted to meet the needs of the educator's students and curriculum. The materials in the book and on the CD provide a framework to ensure that students receive an effective, current and relevant technology education.
