RRP:	\$50.95
Format:	A4, 158 pages
Age Range:	P-12
Category:	Professional Development
Subject:	Information and Communication Technologies

## Summary:

Technological interaction has created a digital society that affords its members opportunities for education, employment, entertainment and social interaction. As in any society, it is expected that digital citizens act in a certain way. Digital Citizenship in Schools is an essential introduction to digital citizenship. Mike Ribble (author of Raising a Digital Child) and Gerald Bailey explore the nine elements of digital citizenship. They provide a useful audit and professional development activities to help educators determine how to go about integrating digital citizenship concepts into the classroom. Activity ideas and lesson plans round out this timely book.
