## Summary:

Language students learn best when given the opportunity to communicate meaningful content in realistic settings. Providing those realistic contexts hasn't always been easy, but – as this book emphatically demonstrates – technology can help. Technology breaks through the constraints of the classroom and offers language students authentic, individualised interactions with members of the French language community. Technology gives students access to French language websites, news outlets, video and other real-world language resources. Technology provides precisely the kind of meaningful interactions and rich experiences that lead to the biggest gains in proficiency.
