GPS and Geocaching in Education

Author: Burt Lo

Date Available: 8 March 2011

ISBN: 978174239 9768
Code: IST9768
RRP: 32.95
Format: 180 x 255, 176 pages
Year Level: P-12
Category: ICT
Subject: Thinking

Summary:

Geocaching is a learning activity that inspires creativity and real-world problem solving. It can help students explore any subject, from literature units to computer programming. In the introduction to GPS and geocaching in Part One, you will learn where to find geocaches, how they are placed, what to do when you locate one, what GPS tools you'll need to use, and more. After you are comfortable with the ins and outs of geocaching, Part Two shows you how to bring this dynamic activity into your classroom by developing lesson plans and integrating geocaching into your curriculum. This book will inspire you and your students to embark on the adventure of geocaching.

Collecting weather data, creating maps of indigenous and invasive plant species, discovering new people and places, and reviewing historical events are just a few fun ways to turn geocaching into an engaging, relevant learning experience.
