Key Selling Points:

- Full of reproducibles
- Tried and tested teacher-friendly lesson plans
- Teach maths using higher level thinking

Summary:

Do you want to move beyond drill and kill, teaching maths for understanding? Do you want to sharpen your students' mathematical thinking skills? Do you want your students to help each other learn about mathematics? Do you want to incorporate multiple intelligences in your maths instruction? Yes? Here's your road map! Includes 36 cooperative writing activities guaranteed to get students thinking and writing about mathematics. The activities are open-ended, so they'll work with every mathematical topic you teach.
