Category:	Cooperative Learning, Environment, Multiple Intelligences
Subject:	Geography, Science

Key Selling Points:

- 26 ready-to-do activities across the curriculum
- Up-to-date Australian content
- Integrate your curriculum with cooperative, MI strategies

Summary:

This book includes 36 ready-to-do cooperative, multiple intelligences activities to explore the rainforest. These interactive activities are a great way to integrate your curriculum and engage your students' many ways of being smart. Working in teams and with classmates, your students will create and sing tropical tunes, write letters to conservation agencies, map the rainforests of the world, learn about the rainforest products, medical mysteries, amazing animals, jungle secrets, layers of life and much more. Loaded with ready-to-use classroom resources. Content on rainforests around the world is covered along with information relevant to Australia's own unique rainforest eco-systems and the exceptional indigenous flora, fauna and environmental conditions contained within them.
