<b>Format:</b>	208 x 298 mm
<b>Extent:</b>	48 pgs
<b>Age range:</b>	early childhood, PreK-3
<b>Category:</b>	special education, literacy, numeracy

### Summary:

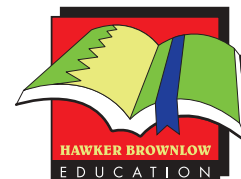

Writing numbers and certain letters can be very tricky. It is not unusual for beginning writers to reverse b, d, p, q, W, M, n, u and s. The author, an experienced teacher of special education and general classes, provides over 40 pages of well-tested exercises to help students eliminate commonly reversed letters and numbers. A solid understanding of 'left' and 'right' is a key concept, and *Correcting Reversals* begins with a straightforward review, using memory tricks. Once a student has mastered this basic skill, they will begin to feel more confident in many areas of study.

### Key selling points:

- Includes rhymes and memory games to help students recall which way to shape their letters and numbers.
- Exercises can be sent home with children as a way to offer parents an opportunity to recognise and assist with areas of difficulty for their child.
- Provides illustrations and examples for both left and right-handed children.

### Supporting resources:

- *Strengthening Visual Discrimination Skills (LDA80021)*
- *Strengthening Visual Memory Skills (LDA80022)*
