

Hawker Brownlow Education

Super Duper Science: Spectacular Space

Author: Annalisa Suid

Date Available:	08 March 2007
ISBN:	1 74025 770 7
Code:	MMA2019
RRP:	24.95
Format:	A4, 80 pages
Age Range:	P-3
Category:	Cooperative learning
Subject:	Science

Key Selling Points:

- Part of a highly popular series of science-related activities
- Great support for thematic cross-curricula units
- Includes reproducible resources and worksheets
- Features literacy links
- Encourages students to read, write and talk about the solar system and universe

Summary:

Most children switch on at the mention of space. This resource offers a range of engaging activities and ideas to round out cross-curricula units and support the study of the solar system, space exploration and the universe.

Employ a fresh approach and invite students to calculate their moon weight, send a postcard from space, or use silly putty to simulate 'black hole' gravity!

The book is divided into four sections. **Hands On Discoveries** provides students the chance to find answers to their questions, and includes reproducible enquiry sheets. **Nonfiction Book Links** features speaking, writing and reporting activities based on nonfiction resources. **Fiction Book Links** uses children's literature as a focus for space-related investigations. **It's Show Time!** offers new lyrics on the space theme for well-known tunes.

The title also includes fact cards, a resource list, and plenty of opportunities for students to demonstrate their creative abilities.
