

Hawker Brownlow Education

Super Duper Science:

Roaming Reptiles

Author: Annalisa McMorrow

Date Available:	19 February 2007
ISBN:	1 74025 933 5
Code:	MMA2100
RRP:	\$24.95
Format:	A4, 80 pp
Age Range:	P-6
Category:	Cooperative Learning
Subject:	Science

Key Selling Points:

- Part of a highly popular series of science-related activities
- Great support for thematic cross-curricula units
- Includes reproducible resources and worksheets
- Features literacy links
- Encourages students to read, write and talk about reptiles

Summary:

Most children respond to reptiles with interest, wondering at the winding way snakes move and expressing awe at the humbling jaws of the crocodile.

This resource offers a range of engaging activities and ideas to round out cross-curricula units and support the study of reptiles. Employ a fresh approach and invite students to interview a lizard, create a turtle shell timeline, or find a chameleon constellation in the sky! The book is divided into four sections. **Hands On Discoveries** provides students the chance to find answers to their questions, and includes reproducible enquiry sheets. **Nonfiction Book Links** features speaking, writing and reporting activities based on nonfiction resources. **Fiction Book Links** uses children's literature as a focus for reptile-related investigations. **It's Show Time!** offers new lyrics on a reptilian theme for well-known tunes.

The title also includes fact cards, a resource list, and plenty of opportunities for students to demonstrate their creative abilities.
