Date Available:	24 September 2008
ISBN:	1 74170 120 1
Code:	NM2058
RRP:	29.95
Format:	A4, 126 pages
Age Range:	Years 6–8
Category:	Middle Years Science
Subject:	Science

Summary:

Kids get excited and engaged when the thought-provoking, creative activities in this book are used! The revised Bloom's Taxonomy provides the framework for these classroom ready activities. Each of the 76 Bloom sheets in the book offers tasks that involve all six levels of learning, from remembering to creating. They can be used as classwork, for enrichment or independent study, for group work, or as a supplement to any science class. They also make great homework assignments for students to complete with the active involvement of parents or family members. Supplementing the Bloom's Sheets is a raft of imaginative activities and alternative ways to assess learning. Student will enjoy the fun aspect of these activities, especially the choice and the chance to be creative.
