

DI: Differentiated Instruction: Enhancing Teaching and Learning (Set of 10)

Author(s): Helene M. Hanson

Date 13 October 2015
Available:
ISBN: NPR9011
Code/SKU: NPR9011
RRP: \$90.00
Format/Page No A4
Year Level: Teachers and
Administrators
Focus Area: Curriculum
**Key Learning
Area:** Cross-Curricular

Summary

Differentiated Instruction (DI) forms the foundation upon which successful instruction and interventions can be built. Teachers need to understand the power of DI and how to implement it into their lesson planning. This valuable reference guide provides:

- A clear understanding of the DI process including “key features”
- Practical strategies to implement DI
- Lesson planning and design strategies
- Information on how DI connects to other critical frameworks such as Response-to-Intervention (RTI) and Universal Design for Learning (UDL).

Helpful websites and print resources are also listed. DI empowers both the teacher and the learner making this approach “must reading” for all educators committed to improving the teaching and learning process.

This set contains 10 copies of the *Data Literacy for Teachers* reference card.
