## Summary

Are you interested in using argument-driven inquiry for middle years lab instruction but aren't sure how to do it? You aren't alone. *Argument-Driven Inquiry in Life Science* is a one-stop source of expertise, advice and investigations, with the information and materials you need to start using this method right away.

The book includes 20 field-tested labs that cover molecules and organisms, ecosystems, biological evolution and heredity. They give your students an opportunity to design their own methods, develop models, collect and analyse data, generate arguments, and critique claims and evidence.

*Student Lab Manual for Argument-Driven Inquiry in Life Science* provides the student materials you need to guide your students through these investigations. With lab details, student hangouts and safety information, your students will be ready to start investigating.
