

# Toward High School Biology: Understanding Growth in Living Things, Student Edition

Author(s): Author Name

**Date Available:** January 2019  
**ISBN:** 9781760567613  
**Code/SKU:** NST7613  
**RRP:** \$35.95  
**Format/Page No.:** A4, 186 pages  
**Year Level:** Year 6, Year 7, Year 8  
**Focus Area:** Activities and Exercises  
**Key Learning Area:** Science

## Summary

Through 19 carefully sequenced lessons and activities, this unit gets middle schoolers ready for next-level learning. Students explore what happens at the molecular level so they can understand how living things grow and repair their body structures. Using Legos, ball-and-stick models, videos, and print manipulatives helps them retain what they learn so they can apply that knowledge later.

Both effective and engaging, *Toward High School Biology*

- Draws on a research-based development approach
- Takes an interdisciplinary approach
- Supports the Next Generation Science Standards
- Is refreshingly easy to use.

*Toward High School Biology, Student Edition* provides the materials you need to guide your students through these investigations. With lesson details, teacher facilitation pages, and handouts, your students will be ready to start investigating.
