Introduction

Children will learn to count and identify numbers 1-12. The games featured in *FolderGames for Early Maths* offer plenty of counting, numeral and number word recognition, and matching skills practice.

Assemble a game for little ones to match wings on butterflies, biscuits and milk, tops on cupcakes and more.

Every game includes ready-to-colour, cut out and assemble game boards; game cards; a cover; and a storage pocket or label. Players follow directions to complete tasks and develop hand-eye coordination as they play these unique, skill-building games.

General Directions

Use sturdy coloured file folders to make FolderGames. Reproduce the game board patterns, cover and any game pieces. Colour all parts with textas, coloured pencils or crayons, then trim and cut out. Glue the game board patterns to the inside of the folder and the cover to the front of the folder.

Options

- Glue any loose patterns or game cards on cardboard for extra-sturdiness. Colour and laminate. Cut out or trim as necessary to complete assembly.
- Colour, cut out and glue storage pockets on manila envelopes with clasps or to the backs of folders to store game pieces.
- Each set of game cards can be used as flash cards; to decorate storage containers, displays and greeting cards; as well as for a game of Concentration.
- Counters can be used to practise counting and solve early addition and subtraction problems.

How To Use

Have the children take out any game pieces from the storage pocket and open the FolderGame on a table. Instruct children on how to play each game. Have the children return game pieces to the storage pocket after play. Store the FolderGames in a file box or basket.
