To Teachers

Addition presents a unique approach to introducing addition facts to young children.

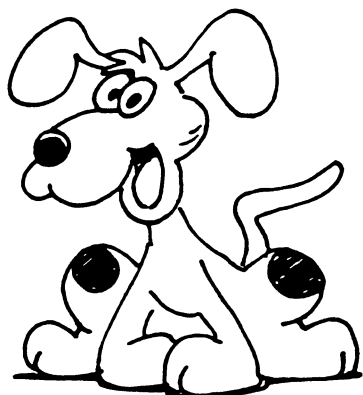

The activity pages include puzzles, coloring activities, cut-and-paste projects, songs, and games. Each activity was specially designed to reinforce the basic addition skills that are commonly introduced at the early childhood level.

The important thing to remember is to focus on the celebration of learning. Make each activity fun and a real celebration!

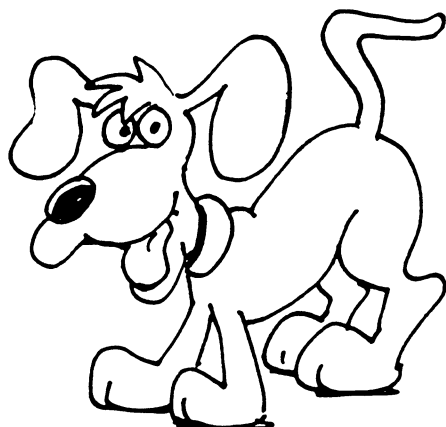

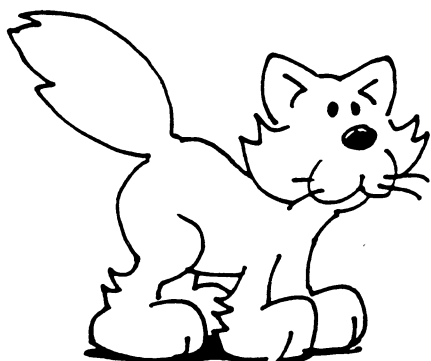

Name _____

Zero in on Zero

Circle the dog with 0 spots.

Circle the cat with 0 stripes.

How many spots on the dog? _____

How many stripes on the cat? _____

Name _____

Adding Fruit

Cut and paste the fruit on the tree. Color the picture.
