a process for responsible future prediction,
ownership and active citizenship

1. Investigate

- I can investigate the present
- I can investigate the past

2. Compare

- I can use a Venn diagram to compare the past with the present so that I understand what has and has not changed over time

3. Evaluate

- I can evaluate the strengths and weaknesses of both the present and the past

4. Ideate Today

- I can generate ideas to impact today
- I can reintroduce strengths from the past that have been lost over time
- I can find solutions for the weaknesses that exist today

5. Ideate Tomorrow

I can generate ideas to impact tomorrow.

- I can record the characteristics that have not changed over time (reference the middle of your Venn).
- I can identify what has changed over time and follow the trend or pattern forward (reference the 'synthesis tools' section of the thinkbox framework; if an increase has occurred over time then continue that trend; if a decrease has occurred over time then continue that trend).
- I can evaluate my prediction
- I can generate a proactive plan to direct and own the future

6. Innovate and Celebrate

- I can put my ideas into action
- I can celebrate my learning
