

The Thinking Tool Kit 2

From The Thinking Tool Kit 2 • HBP126

Concept map

WINCE

Want	Identify	Need	Create	Evaluate
What do I want to know?	Identify what I already know?	What additional information do I need?	What have I created?	What have I learned from evaluating this activity?

Thinking cloud

PSDR

- 1 **Predict**
- 2 **Share**
- 3 **Do**
- 4 **Reflect**

ARC

Action	Reaction	Consequences
What will you do now?	How will the other person react?	What will be the outcomes?

BROW

- Brainstorm**
- Read**
- Organise**
- Write**

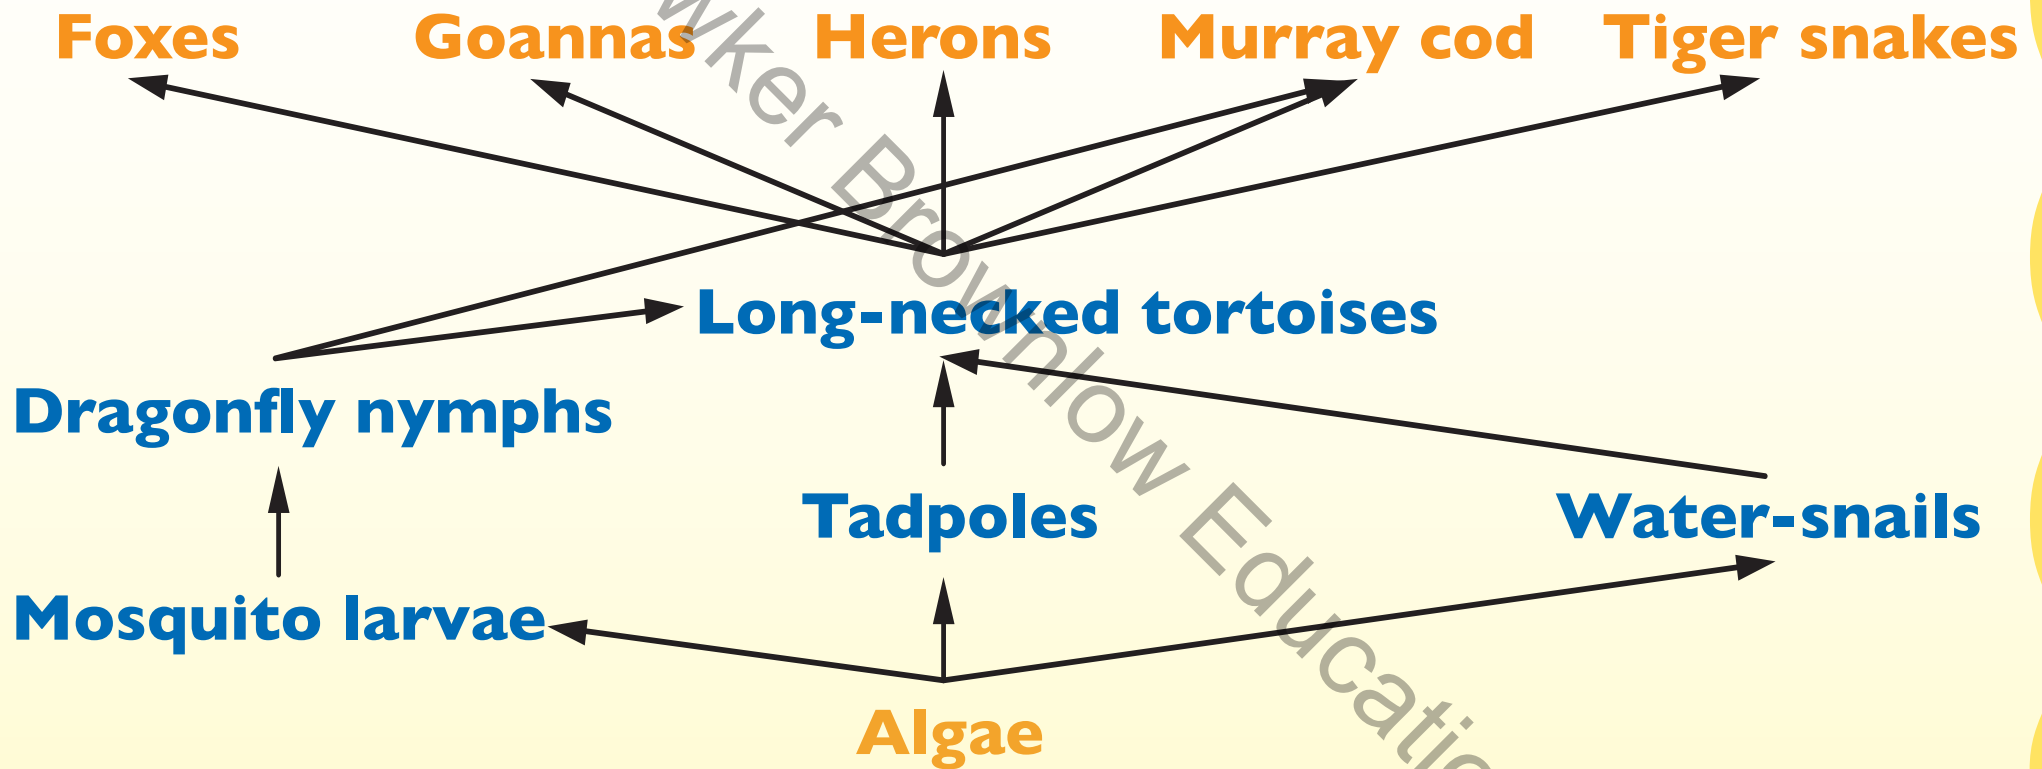

TREC

Think	Read	Estimate	Calculate
Get your brain into action.	Read the question.	Estimate what you believe the answer should be.	Carry out the calculations required.
When working with mathematics, what do we normally do?	If you do not understand it, read it again.	Is your estimate similar to your team members'?	How close is your answer to your estimation?
			How do you know that you have the right answer?

Think

Get your brain into action.

When working with mathematics, what do we normally do?

Read

Read the question.

If you do not understand it, read it again.

Estimate

Estimate what you believe the answer should be.

Is your estimate similar to your team members'?

Calculate

Carry out the calculations required.

How close is your answer to your estimation?

How do you know that you have the right answer?
