Craft Fun		My Challenge	68
Your Fingerprints	35	Answers	between pages 34 and 35
Edible Pictures	36		
Mud Collage.....	37		

Introduction

Challenge Your Child is designed to provide a wide range of fun learning experiences for your youngster. Varied formats tap into all levels of cognition, from basic knowledge to more complex abilities such as comprehension, application, analysis, synthesis and evaluation. Encourage your child to think on all these levels by recalling, applying, organising and assessing learned material.

Take an active role in your child's learning. Guide your child through the activities in this book, focusing on those that are best suited to him or her. Reluctant readers may need help reading directions in order to complete some activities. Use the activities as a springboard for further investigations. The level of interest you show will serve to increase your child's own motivation.

You will see an important icon in this book that appears on pages that require adult permission, supervision or other assistance. Make sure your child understands the importance of asking for help to complete these activities.

The answers to activities, which are easily removable, are provided at the centre of this book for easy self-checking.

Spider Search

analysis

Find the hidden spiders. Colour in each one you find **black, grey or brown.**

How many spiders did you find? _____

analysis

What's Wrong?

Can you find ten things wrong with this picture?
Circle each wrong thing you find.

Tricky Triplets

Colour each set of triplets the same colour.
