PARTY BASICS

Here are a few key items to consider before you have a party.

WHY HAVE A PARTY?

Your party can be for a special occasion or just something to do with a few close friends. There are lots of great reasons to have a party:

- your birthday
- football final party
- a holiday or special event
- a get together for fun
- you share a common interest with others
- end of school year party

HOW MANY FRIENDS SHOULD COME?

1 Think about fun.
How many friends do you want to come? What are you planning on doing? Would it be more fun with a large group or a small group? Get input from parents and a friend.

2 Think about space. Where will your party be? How much space do you need? How much space is available in or around your home?

3 Think about cost. What supplies will you need? What food and drink will you be providing? What is your budget?
