GAME CARD PATTERNS	38–47
---------------------------------	--------------

Using this book and a few common materials you will be able to provide 37 board games for your Year 1 classroom. These games are designed to provide important practice for children learning their maths facts and algorithms, and will help children memorise their facts in an enjoyable yet effective way.

With directions provided on each game board, these easy-to-learn games are perfect for when students need to work independently. If you are searching for ways to involve parents or guardians in their children's maths experiences, create take-home maths-game kits by mounting the game boards on file folders and attaching small envelopes for game pieces. The games can then be used as homework assignments. Children may even choose to play one of these games at recess or in their free time.

Before distributing the game materials to students, read the directions and prepare the materials. Most of the games use 'cards' that are supplied at the end of this book. (This is also indicated in each game's directions.) To prepare the cards, photocopy the pattern pages, then cut out the cards. The games will last longer if glued onto cardboard, and it will not be possible to read the problems through the back. Enlarge the game board and/or cards if possible. You could also laminate the cards for extra durability.

Most games also need markers. The markers must fit in the spaces on the game board, and they must be easy to pick up. Different colours or kinds will enable players to distinguish their game markers from their opponents'. Here are some items that could be used as game markers:

- counters
- buttons
- macaroni
- paperclips
- lollies

- dried beans
- centimetre cubes
- wads or squares of cardboard
- styrofoam packing materials
- game markers from commercial games.

You may also use crayons.

This book can be used in many different ways. If a game is being introduced to the whole class, reproduce the game board on a transparency and use an overhead projector. Some teachers prefer to introduce a game to a group and have just that group use it. At other times, a game may be given to a pair or group of children who can read the directions and follow them on their own. If a child cannot read the directions, she or he can be paired with someone who can.

When children are playing a game, they should check each other's answers and use paper if necessary. Figuring out answers mentally, or memorising them, is the goal. The game cards can be used as flashcards or even as timed tests.

Use these games as part of your maths program to provide delightful maths experiences for children who have not yet mastered their facts or computation skills.

BINGO FOR TWO

Players: 2

Object: To be the first player with 4 markers in a row

Other Materials: Cards A and B, game markers

To Play:

1. Mix up the cards and place them *face down* in a pile.
2. Each player chooses a bingo board.
3. Each player draws a card, calls out the answer, and marks one of the squares with the correct answer on his or her bingo board.
4. If no answer is left, the player loses that turn.
5. Play until someone covers 4 squares in a \rightarrow , \downarrow or \nearrow row.
6. Play again. Keep track of who wins.

CRAZY BINGO

Players: 2

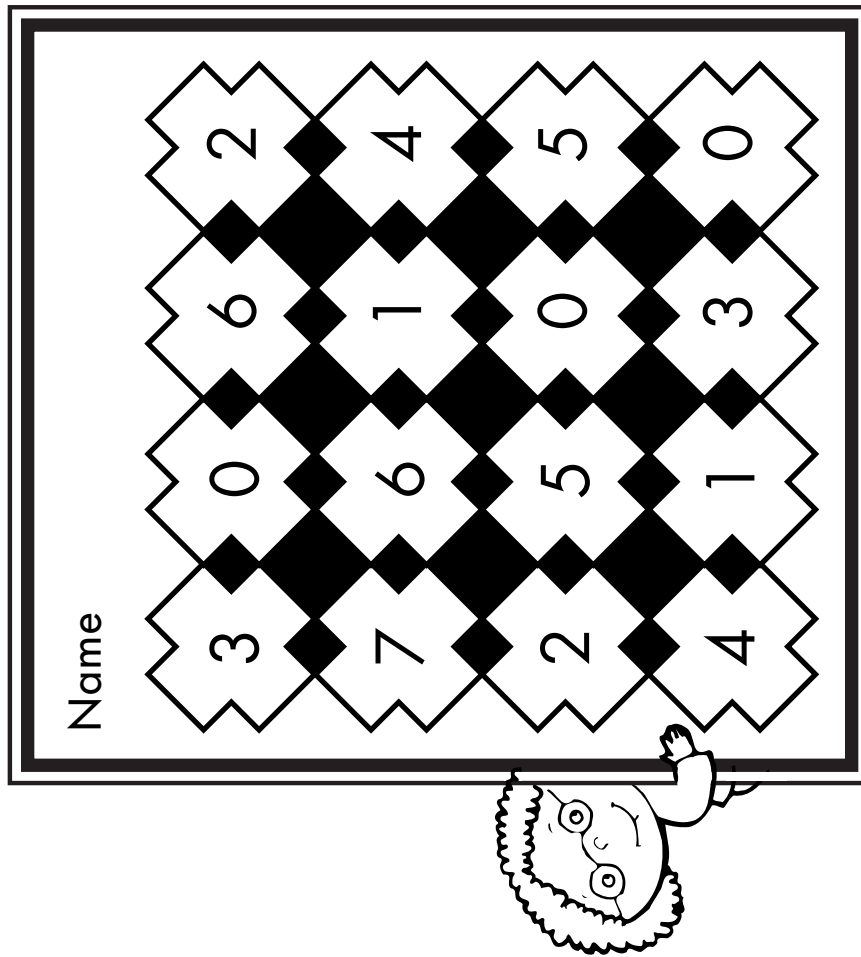

Object: To be the first player to have 4 markers in a row

Other Materials: Cards C, game markers

To Play:

1. Mix up the cards and place them *face down* in a pile.
2. Each player chooses a bingo board.
3. Each player draws a card, calls out the answer, and marks one of the squares with the correct answer on his or her bingo board.
4. If no answer is left, the player loses that turn.
5. Continue playing until someone has 4 markers in a →, ↓ or ↗ row.
6. Play again. Keep track of who wins.

CLIMB THE EMPIRE STATE BUILDING!

Players: 2

Object: To reach the 'Winner' floor

Other Materials: Cards I and J, game marker for each player

To Play:

1. Mix up the cards and place them *face down* in a pile.
2. Each player places a game marker at 'Start'.
3. For each round of play, each player takes a card and reads the number.
4. The player with the higher number moves his or her game marker up a floor.
5. If the numbers are equal, discard the cards and draw new cards.
6. Play until someone reaches the 'Winner' floor.
