

# which one doesn't belong?

---

A SHAPES BOOK / CHRISTOPHER DANIELSON

Did you choose the shape  
in the lower left?

If you did, maybe it's because  
this shape isn't coloured in.

On every page of this book,  
you can choose any shape and  
say that it doesn't belong.

The important thing is  
to have a reason why.

How is your shape different  
from the others?

What if you had picked  
a different shape?

which one doesn't belong?
