Introduction

What is <i>HyperStudio</i> ?	8
What is <i>HyperStudio for Terrified Teachers</i> ?	9
Does it matter which platform you are working on?	10
Does it matter which version of <i>HyperStudio</i> you are using?	10
Do you need access to the <i>HyperStudio</i> CD-ROM?	10
What is on the <i>HyperStudio for Terrified Teachers</i> CD-ROM?	10

Lesson 1: Getting Off to the Right Start

Starting up <i>HyperStudio</i>	11
What are cards and stacks?	12
Hiding and showing the Menu Bar	13
Setting <i>HyperStudio</i> 's Preferences to "Experienced User"	13
Creating a new stack.	15
Setting the number of colors and card size	16
Differentiating between the title bar and the menu bar	19
Navigating from card to card (menu/keystroke commands).	20
Navigating from card to card (using the Navigation Extra)	21
Navigation-related Extras	23
Using the Menu Tamer Extra	23
Using the Title Card Extra	24
Using the Storyboard Extra.	24
Copying, cutting, pasting, and deleting cards	26
A little bit of circular reasoning	27
Card information and settings.	27
Stack information and settings	28
Stack Preferences	29
A recommendation about setting Preferences	32
Options for saving a stack.	33
Stack saving recommendation (using folders)	33
Stack saving recommendation (cross-platform naming)	35
Stack saving recommendation (disk media)	35
Stack saving recommendation (how often to save a stack)	36

Lesson 2: The Art of *HyperStudio*

Some opening thoughts	37
-----------------------	----

Table of Contents *(cont.)*

Accessing tools and colors	37
More about colors	40
Categories of tools	40
An overview of the painting tools	41
An overview of the selecting tools	48
Some additional information about the selecting tools	58
A commentary about using clip art in <i>HyperStudio</i> stacks	58
Distinguishing between “backgrounds” and “clip art”	59
Accessing pictures via the menu	59
Accessing pictures via the Media Window	65
Viewing files in the Content Library	67
Other ways to access pictures	69
Creating your own picture archive	69
Lesson 3: Achieving Just the Right Effect	
Replacing and exchanging colors	70
Working with gradients	73
Learning to cookie cut	76
Exploring the <i>HyperStudio</i> effects filters	82
Laying out a grid	88
Grid notice	89
Exporting the screen	89
Lesson 4: Reaching a Whole New Level	
Some opening thoughts	91
Types of buttons	91
Button names and icons	93
Positioning and resizing buttons	96
Button actions	97
Browse mode vs. edit mode	101
Button features	102
Attaching a sound via the Media Window	104
Button editing options	105
When to single-click and when to double-click	105
Buttons, buttons, and more buttons	106

Table of Contents *(cont.)*

Graphic objects vs. clip art	106
Adding a graphic object directly to a card.	106
Graphic object names, frames, and opacity	107
Graphic object editing options	108
Graphic object features.	108
Cursor caveat	110
Object layers	110
Converting a portion of the background to a graphic object	111
Replacing the background for a translucent graphic object	113
Addy performs a magic trick	113
Addy begs for applause	116
Lesson 5: Doing Things the “Write” Way	
Creating text with <i>HyperStudio</i>	117
The text tool.	117
The Format menu	117
Creating patterned text	121
Creating gradient text	121
Creating cookie cutter text	122
Creating a text object	125
Using the Text Appearance dialog box	126
Text object features.	128
Entering text into a text object	129
Modifying text with the browse tool (I-beam pointer).	130
Doing a text search.	130
Spell checking text	130
Modifying text with the editing tool	133
Exporting text.	133
Printing text	133
Making text interactive.	135
Using the GhostWriter NBA.	136
Using the BlabberMouth NBA	137
Using the RollCredits NBA	139
Editing a button action	140
Creating a hypertext link.	140

Table of Contents *(cont.)*

Some things to keep in mind about hypertext links	141
Extra help taming your text	142
Text objects vs. painted text	143
Lesson 6: Stacking Things in Your Favor	
Some opening thoughts.	145
Creating ready made cards	145
Creating cards with the same background.	154
Creating group cards.	154
How to tell if two or more cards are in a group.	155
Group card caveat.	156
Adding objects to group cards	156
Having multiple groups within a stack	156
A unique capability of group text objects	157
Same background cards vs. group cards	157
A closing “tip” about group cards.	157
Lesson 7: Multimedia in Motion	
An overview of <i>HyperStudio</i> animation	158
Animation sources	159
Animating an image on a card	159
Using the Animation dialog box	160
Adding the illusion of depth	163
Animating a disk-based GIF file.	164
Path options	168
Editing a path.	169
Using the Path Options dialog box	169
Completing the illusion of depth.	171
Going beyond.	172
Lesson 8: A Sound Investment	
Using the Digital Audio Deck.	174
Saving a sound	178
Saving a stack with compressed sounds	178
Editing sounds with <i>Sound Companion for HyperStudio</i>	179
Using the CDPlay NBA	181

Table of Contents *(cont.)*

Lesson 9: Lights! Camera! Action!

Some opening thoughts.	186
Other sources for clip art, backgrounds, and graphic objects.	188
Importing pictures from a video source.	188
Importing pictures from a digital camera	191
Importing pictures from a TWAIN scanner (Windows only)	194
Importing pictures from other scanners.	196
Sources for movies and video.	197
Movie formats	197
Movie types	199
Playing a standard movie	199
Playing an audio-only movie	202
Playing <i>QuickTime</i> VR object and panorama movies	204
Additional movie sources	205
Creating and saving your own <i>QuickTime</i> movies.	205
Editing <i>QuickTime</i> movies	209
Creating your own <i>QuickTime</i> VR movies	210
“Morphing” movies and images	212
Controlling a laserdisc player	213
Using live video	216

Lesson 10: Getting *Hyper* on the Net

Some opening thoughts.	218
Linking to the Internet using the Go to URL action	219
Linking to the Internet using the NetPage NBA	220
Linking to the Internet using Auto URL hypertext links	221
Using the Export WebPage Extra	222
Using the <i>HyperStudio</i> Plug-in	225
Problems posting stacks to the Internet.	229
Using <i>HyperStudio</i> with <i>SiteCentral</i>	232

Planning for Success

The importance of planning <i>HyperStudio</i> projects.	236
Examples of <i>HyperStudio</i> planning sheets for students	237
Facilitating the student <i>HyperStudio</i> planning process	237

Table of Contents *(cont.)*

A discussion about the projects included in this book	238
<i>HyperStudio</i> Stack Student Card Planning Sheet	240
<i>HyperStudio</i> Multimedia Menu Card Planning Sheet	243
Project 1: Hyper-Alliteration	
Curricular Objective / Year Level / Project Overview	249
Materials on the CD	249
Using the Introduction Template Stack	249
Using the Class Menu Template Stack	250
Using the Student Template Stack	251
Using the Example Student Stack	254
Closing Remarks	258
Hyper-Alliteration Planning Sheet	259
Project 2: We're Moving!	
Curricular Objective / Year Level / Project Overview	260
Materials on the CD	260
Using the Introduction Template Stack	260
Using the Class Menu Template Stack	263
Using the Student Template Stack	267
Extending the Project	269
We're Moving! Planning Sheet	270
Project 3: Endangered Species	
Curricular Objective / Year Level / Project Overview	272
Materials on the CD	273
Using the Introduction Template Stack	273
Using the Class Menu Template Stack	275
Using the Title Card of the Student Template Stack	275
Using the Information Cards of the Student Template Stack	277
Endangered Species Planning Sheet	279

Lesson 1: Getting Off to the Right Start

The goal of this lesson is to acquaint you with the user interface, basic terminology, navigation features, preference settings, and save capabilities of *HyperStudio*.

Starting up *HyperStudio*

Start up *HyperStudio*. After a few moments, you will come to a card like the one in Figure 1-1 below. This is part of the “Tip of the Day!” stack. By default, each time you start up *HyperStudio*, you will first arrive at a random card in this stack, on which, among other things, you can view a handy tip for using the program.

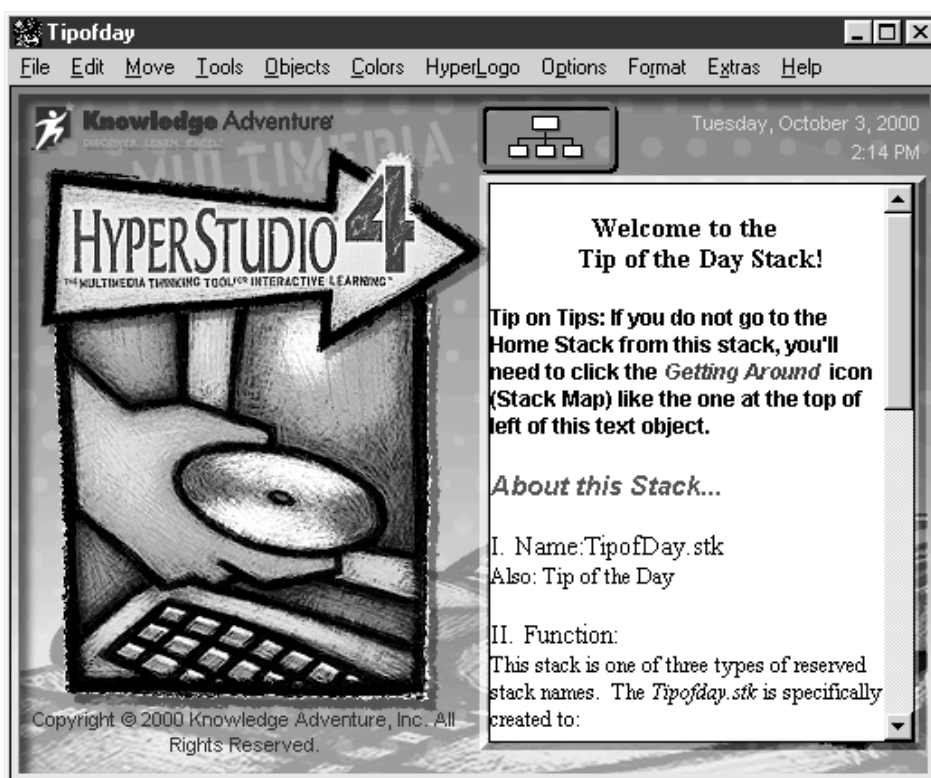

Figure 1-1. “Tip of the Day!” stack

At this point, you can do a number of things, including creating a new stack. For now, though, click on the “Home” button at the bottom of the card. (Or, you can click the large “*HyperStudio 4*” arrow.)
