Summary

The Boy with a Different Brain: Creating Awareness and Acceptance of Children with Autism Spectrum Disorder has been created to provide teachers and educators with a vibrant, engaging resource with which to educate students about Autism Spectrum Disorder (ASD). Written from the perspective of an eight-year-old boy and featuring bright and dynamic illustrations from Skye McBain, author Brooke Ross' text is designed to help students build a sense of awareness and understanding of the behaviours associated with ASD.

The book features informative Teachers' Notes and a Teacher Activity to assist educators in building on students' knowledge and understanding.
