Summary

Enhance your students' learning strengths with this set of full-colour SRA3 posters.

Imagine a school where the motto is 'Here, everyone gets smart'. Not just some students. Every student. In *Neurodevelopmental differentiation: Optimising brain systems to maximise learning*, clinical psychologist Andrew Fuller and educator Lucy Fuller make teachers' working lives easier and more effective by helping them to detect what might be stopping students from achieving more success.

This set of eleven posters features:

- how to use learning strengths to build success
- your learning strengths
- where you can use your learning strengths
- descriptions of each individual learning strength.

The vibrant and colourful posters will be a wonderful addition to any classroom. Use this set to complement your instruction and your development of each student's unique learning strengths.
