ISBN: IST4002
Code/SKU: IST4002
RRP: \$32.00
Year Level: 5–12, Teachers and Administrators
Focus Area: Activities and Exercises, Classroom Practice and Direct Instruction, Curriculum, Professional Development
Key Learning Area: Cross-Curricular

Summary

Flipped classroom pioneers Jonathan Bergmann and Aaron Sams take their revolutionary education philosophy to the next level in *Flipped Learning*. Building on the energy of the thousands of educators inspired by the influential book *Flip Your Classroom*, this instalment is all about what happens next. The flipped classroom encompasses direct instruction delivered to the individual outside of the class, and more strategic use of in-class time for group work and individualised attention.

The *Flipped Learning + Workbook* bundle will take you to the logical next step in the evolution of the flipped classroom – flipped learning – a path toward powerful learning and teaching strategies that can transform learning by engaging each student and taking their learning deeper and further. Flipping, combined with individualised learning strategies, changes everything. But you may still be wondering, “How can this model work for me?” While there’s no step-by-step formula for flipped learning success, this bundle will guide you through developing an approach to flipped learning that will serve you and your students.

The companion workbook includes questions and activities to help you reflect on the why and how of flipping your classroom. You’ll explore the flipped classroom and flipped-mastery models while delving into key elements of flipped learning, such as crediting or finding videos, designing a flipped lesson, preparing for change and working with administrators.

Flipped learning will transform your teaching, once again turning your expectations upside-down and fuelling your excitement for teaching and learning. Learn how to do it your way.
