**ISBN:** 978 1 76001 898 6  
**Code/SKU:** NST8986  
**RRP:** \$15.00  
**Format/Page No.:** B5, 32 pages  
**Year Level:** F–3  
**Focus Area:** Activities and Exercises  
**Key Learning Area:** Science, English

## Summary

Children who love both animals and a rousing game of I Spy will have fun with this full-colour, illustrated story book. To give kids practice identifying similarities and differences, the book starts by pairing easy-to-distinguish animals, such as zebras and horses. Then it moves on to duos that are more difficult to tell apart, such as turtles and tortoises and seals and sea lions. Reading *Animals Two by Two* is like taking a walk through the zoo with an eagle-eyed friend – one who wants to know if you can spot the differences between a frog and a toad or a mole and a vole!

*Animals Two by Two* is part of the *I Wonder Why* book series, and written to ignite the curiosity of children in years F–3 while encouraging them to become avid readers.

The *I Wonder Why* series is a set of science books created specifically for young learners who are in their first years of school. The content for each book was chosen to be appropriate for youngsters who are beginning to construct knowledge of the world around them. These youngsters ask questions. They want to know about things. They are more curious than they will be when they are a decade older. Research shows that science is students' favourite subject when they enter school for the first time.

These books explore the marvels of animals, plants and other phenomena related to biology. Included in each volume is a Parent/Teacher Handbook with coordinating activities. The *I Wonder Why* series is written by an award-winning science educator. After completing a science activity, rereading or referring back to the book and talking about connections with the activity can be a deepening experience that stabilises the learning as a long-term memory.
