Development, School
Improvement
**Key Learning
Area:** Cross-Curricular,
Technologies

Summary

Educators are teaching and learning in a digital world. From interactive whiteboards, to iPads, to flipped classrooms, teachers are using a variety of methods to create, collaborate and communicate with their students. Although this transition to digital spaces makes for exciting times in the classroom, it can be daunting for leaders.

So how can school leaders use technology to be more effective? In this book, award-winning blogger and education technology expert Steven W. Anderson explains how and why leaders should use technology and outlines what should be in every leader's digital toolkit. This resource will help leaders

- maximise social media to stay connected with teachers, students and the community
- use online collaborative tools to manage documents and increase collaboration
- identify online tools to stay organised
- develop online professional learning networks

Digital tools can play an important role not only in streamlining how school leaders do their jobs, but also in helping them get better results – no matter what the initiative.

The Tech-Savvy Administrator is part of the ASCD Arias series of publications, providing concise answers to challenging questions in a convenient format that you can read in one sitting and immediately put into practice. Arias books are the next-generation, immediate-need resources for everyone committed to the success of each learner.
