

Teaching for lifelong learning

How to prepare students for a changing world

Elliott Seif

Date Available	July 2021
ISBN	9781760944124
Code/SKU	SOT4124
Price	\$44.95
Format	180 × 250 mm, 226 pages
Type	Professional development
Level	Primary Secondary
Topics	21st century skills Engagement Teaching practice
Supplementary resources	Download reproducible resources at go.hbe.com.au

Summary

How can teachers ensure students will continue to challenge and educate themselves after graduation so they can succeed throughout their lives? In *Teaching for lifelong learning: How to prepare students for a changing world*, author Elliott Seif distinguishes a four-phase instructional framework: (1) setting the stage, (2) building the foundation, (3) deepening learning and (4) providing closure. With the framework and coordinating strategies, F–12 educators facilitate key goals, criteria and principles to support learning beyond the classroom. When educators align their curriculum and assessments with the principles and criteria for lifelong learning, students can continually show essential skills like making connections, synthesising ideas and collaborating.

Readers will:

- gain strategies and activities specific to each instructional phase, plus a core set of activities that work across all four phases
- support students as independent learners through four key educator goals – (1) develop a growth mindset in students, (2) build a foundation of key understandings and skills, (3) deepen learning and (4) broaden and enrich student experiences
- know what lifelong learning criteria to look for when auditing an existing curriculum or choosing or designing a new one
- review examples of the four instructional phases in various student-centred primary, middle and high school classrooms
- understand why civics education is important to lifelong learning and receive resources and guidelines for creating a civics education curriculum.
