Summary:
To embrace current and future learning demands, schools need to go beyond content to develop skills in communication, collaboration, critical thinking, creativity, and global and cross-cultural awareness. This book helps teachers translate standards-based instruction into 21st century learning projects. Explore 21st century skills in the context of project learning. Discover e-tools that can enhance projects. Learn research-based, high-yield instructional strategies that engage all students, especially those who do not respond to repetitive drills and worksheets. Improve your project planning with a method that emphasises outcomes over means. Sample projects show how to translate traditional content into enriched learning experiences.
