Author(s): Patsy Lanclos

Date Available: 14 February 2014
ISBN: 978 1 74330 740 3
Code/SKU: VIS7403
RRP: $39.95
Format/Page No.: A4, 134 pages
Age Group: P–12, Professional Development
Topic: Activities & Exercises
Learning Area: Science, Technology

Summary:

In today’s world, the efficiency and flexibility of technology is just as important in the classroom as it is in everyday life. Laptop and desktop computers are becoming a thing of the past, and devices such as the iPad, iPhone and iPod touch are quickly becoming the new way of keeping in touch with the world. With iLearn iTeach STEM Life Science Apps for iPad you will be able to show students a variety of different subjects relating to life science, including the human brain, the circulatory system, animal dissections, vitamins and minerals, and many more.

This is the perfect resource for teachers looking to inform students about the fields of biology and health, and contains a comprehensive list of the best apps available from the iTunes Store. Each entry contains a link to the app, pricing information and a short description of what the app can do. Using these applications you will be able to bring the worlds of biology and health to life right in front of your students, with 3-D models and interactive videos illustrating the ideas essential to understanding how our bodies work and the scientific principles present in everyday life.

Use your iPad to engage, teach, explore, innovate and create with iLearn iTeach STEM Life Science Apps for iPad, and watch as science comes to life in your classroom.
