

Hawker Brownlow Education

Real-Life Science: Biology, Middle Years

Author: Pam Dodman

Date 25 February 2011
Available:
ISBN: 978174239 8474
Code: WAL8747
RRP: \$25.95
Format: A4, 92 pages
Year Level: Middle Years
Category: Science
Subject: Biology

Summary:

Use these engaging lessons to help your students explore the intriguing ways that science is at work all around them!

The Real-Life Science series is designed to engage students with topics of high interest that involve places, phenomena, technology and concepts that they may encounter in their everyday lives. The topics were developed to address a number of science concepts. Each activity has a teacher page that outlines the goal, context and answers, and provides extension activity options. Student pages consist of information about the topic being explored, and comprehension questions to gauge student understanding.

Exercises within this book include:

- Do Snakes Really Have Cold Blood?
- Why Do Cats' Pupils Look Like Slits?
- Why Does My Skin Look Wrinkly After a Bath?
- What Causes an Ice-Cream Headache?
- Is Global Warming for Real?

Other Books in the Real-Life Science Series:

- *Real-Life Science: Earth Sciences* (WAL8792)
- *Real-Life Science: Chemistry* (WAL8754)
- *Real-Life Science: Physics* (WAL8808)
